# HAVE YOU BEEN EXPOSED TO COVID-19?

If you've been in close contact (< 6 feet) for ≥ 15 minutes with someone known to have COVID-19, you may be at risk.

<table>

<th>Employee</th>
<th>Exposed to</th>
<th>Employee/Patient</th>
<th>Risk Level</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Wearing mask</td>
<td>Wearing mask</td>
<td>Lower risk exposure</td>
</tr>
<tr>
<td></td>
<td>Wearing mask and faceshield or goggles</td>
<td>Wearing nothing</td>
<td>No quarantine</td>
</tr>
<tr>
<td></td>
<td>Wearing mask</td>
<td>Wearing nothing</td>
<td>Moderate to higher exposure</td>
</tr>
<tr>
<td></td>
<td>Wearing nothing or wearing only eye protection</td>
<td>Wearing nothing or wearing mask</td>
<td>Quarantine if possible</td>
</tr>
</tbody>
</table>

* All employees should be self-monitoring for symptoms at all times. Call your supervisor if you develop any symptoms and do not come to work.

### Aerosol Generating Procedures (AGP):

AGPs are procedures that could generate infectious aerosol and droplets as a source of respiratory pathogens. Such procedures should be performed cautiously and avoided if possible.

<table>
<thead>
<tr>
<th>Not wearing all of the following: N95 mask, gown, gloves, and faceshield or goggles</th>
<th>Regardess of mask or other PPE</th>
<th>Highest risk exposure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regardess of mask or other PPE</td>
<td>Highest risk exposure</td>
<td>Quarantine</td>
</tr>
</tbody>
</table>

PPE guidelines for high-risk AGPs must be followed when performing the following procedures:

- Bag mask ventilation
- Manual ventilation
- Endotracheal tube intubation
- Endotracheal tube extubation
- Nebulizer treatment
- Bronchoscopy
- Laryngoscopy
- Endoscopy (upper and lower)
- Cardiopulmonary resuscitation (CPR)
- BIPAP/CPAP
- High-flow nasal cannula
- Chest physiotherapy
- Breaking ventilator circuit
- Surgical procedures of the upper airway (e.g., by OMFs or ENT)

If you think you've had a significant exposure, please call 305-243-8378.
